

FlashID User Manual

FlashID — South Africa's Digital ID Wallet

Welcome

FlashID lets you carry a verified digital version of your South African ID and other credentials in one secure wallet on your phone. No more carrying a physical ID book, verify who you are with a few taps.

This manual assumes no prior experience with digital wallets or ID verification systems.

What This Manual Covers

Section	Use this when...
1. Create an Account & Sign In	It's your first time using FlashID
2. Verify Your Identity	You've just registered and need to link your real ID
3. Your Wallet Dashboard	You want an overview of your credentials and activity
4. View & Manage Credentials	You want to see, share, or check a specific credential
5. Activity & Notifications	You want to see what's happened on your account recently
6. Account Settings	You want to update your details or delete your account
7. Security Features	You want to know how FlashID protects you
8. Troubleshooting	Something isn't working

1. Before You Begin

You will need:

- A computer or smartphone with a modern browser
- An email address
- Your South African ID number (13 digits)

- A stable internet connection

2. Create an Account & Sign In

2.1 What is it?

Your account is the key to your wallet. It's protected by your email and password, and every credential you add is tied to it.

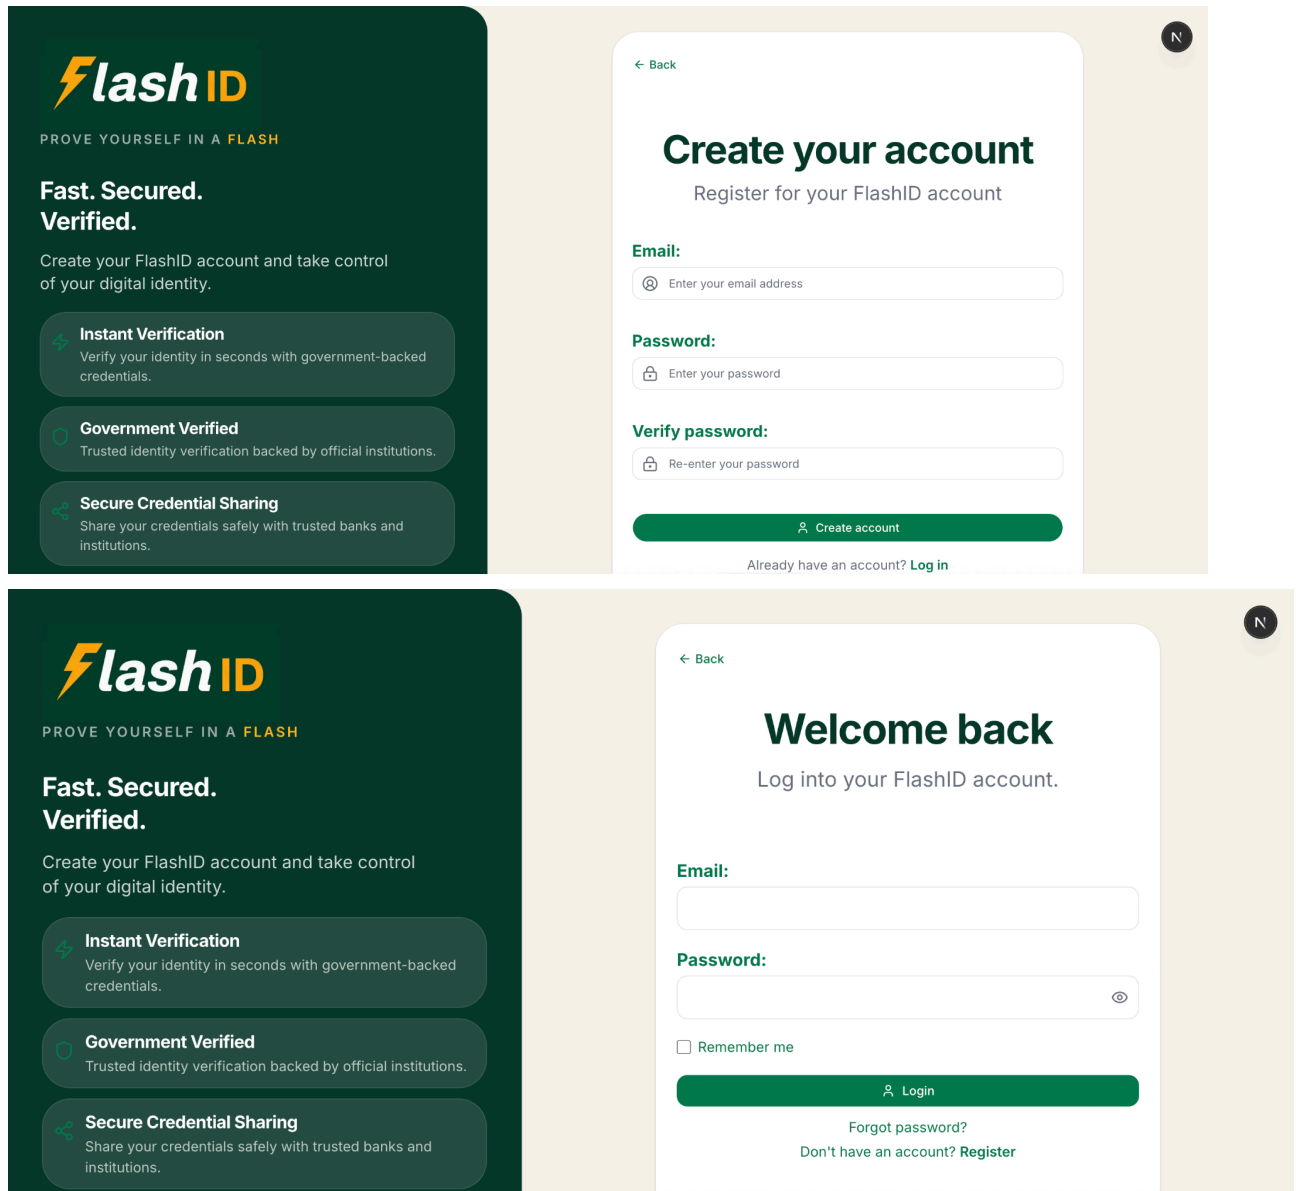

2.2 How to use it

First time:

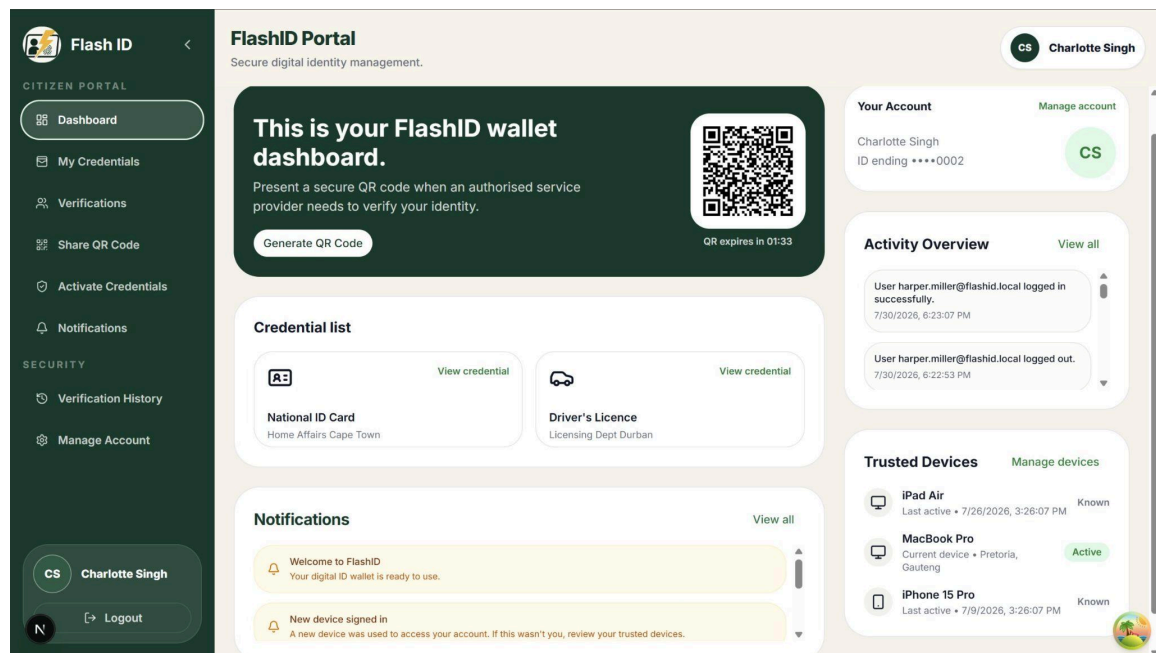

1. Open the FlashID app or website.
2. Click Sign Up.
3. Enter your email address and choose a password.
4. Click Register.
5. You'll be signed in and taken to your dashboard.

Returning:

1. Click Sign In.
2. Enter your email and password.

2.3 What you should see
After signing in, you land on the Citizen Dashboard.

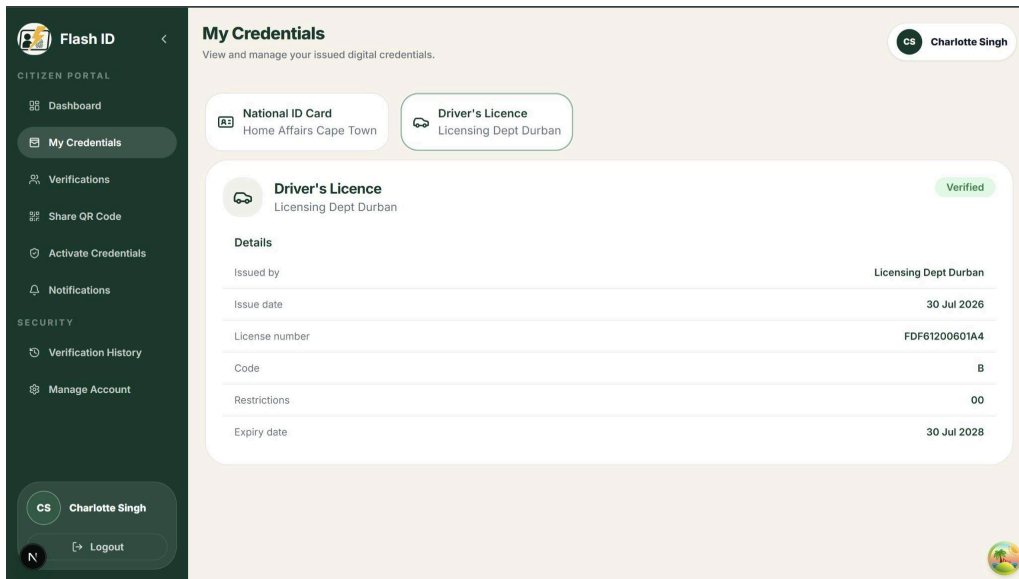

2.4 What if it goes wrong?

- Email/password incorrect – Double-check both fields.
- Password rejected – Use a stronger password.
- Signed out automatically – Sessions expire after inactivity.

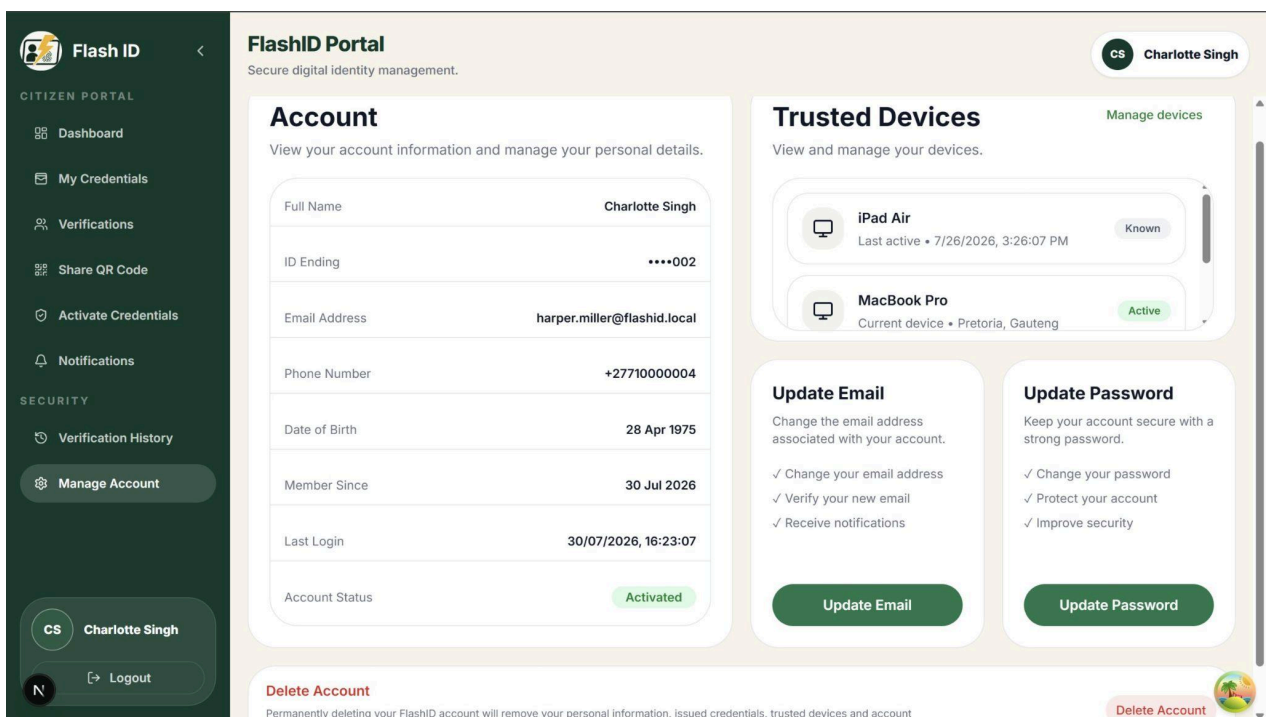

3. Your Wallet Dashboard

This page provides quick access to your credentials. To access the Wallet Dashboard, simply log in to your FlashID account.

4. Manage User Page

Here, you can view your account information, update your email address, change your password and permanently delete your account if required. To access this page, log in to FlashID and select Manage Account from the dashboard or account menu.

5. Sharing a Credential

FlashID allows you to securely share your credentials with third parties.

1. Open the credential.
2. Select what to share.
3. Present the QR code to requesting organisation.
