FlashID

South African Digital ID Wallet

Welcome to FlashID

FlashID lets you carry a verified digital version of your South African ID and other credentials in one secure wallet on your phone or computer.

Instead of carrying a physical ID book or laminated card, FlashID allows you to access and use your digital credentials when you need to verify who you are.

FlashID is designed to make digital identity management simple, secure, and convenient.

This manual is written for users who may have no previous experience with digital wallets or digital identity verification.

With FlashID, you can:

- Create an account and sign in.
- Verify your identity.
- Access your digital identity wallet.
- View your credentials.
- Manage and use your credentials.
- Review activity associated with your account.
- Manage your account and security settings.

Explanation videos are available at:

Create an Account & Sign In

If you are using FlashID for the first time, you need to create an account before using your digital wallet.

Create an Account
To create your FlashID account:

Step 1: Open FlashID
- Open the FlashID application or visit the FlashID website.

Step 2: Select Register
- On the welcome or login screen, select Register.

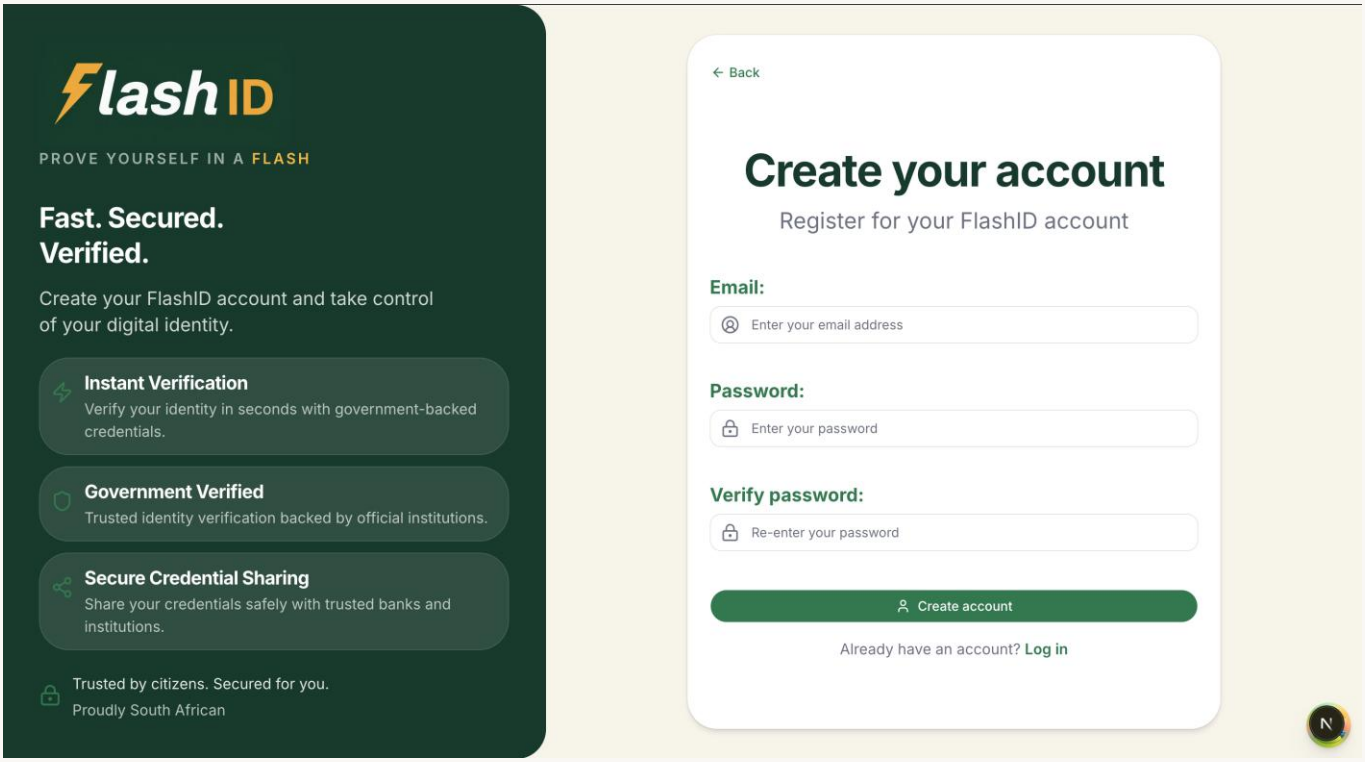

Step 3: Enter your email address

- Enter the email address that you want to use for your FlashID account.
- Make sure that you enter the correct email address, as it will be associated with your account.

Step 4: Choose a password

- Create a password for your account.
- Verify your password

Step 5: Click the Create Account button

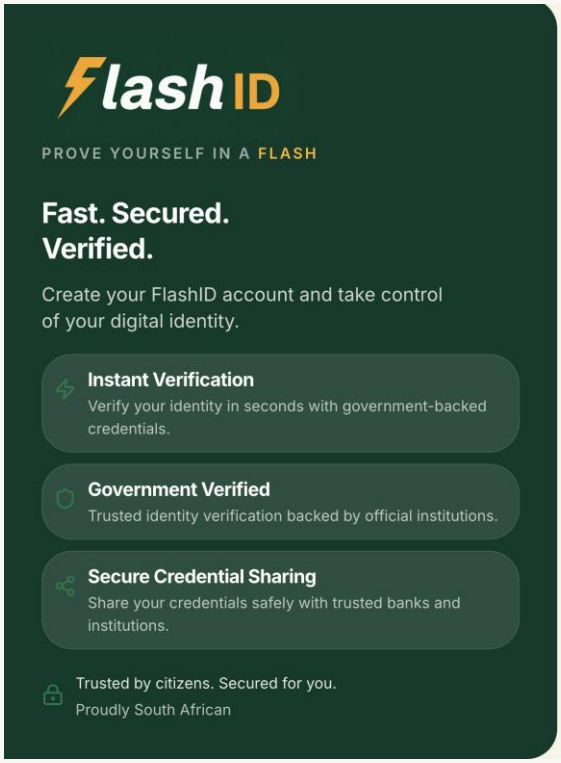

- Select Click Account to create your account.
- Once registration is successful, you will be redirected to log in to be taken to your dashboard.

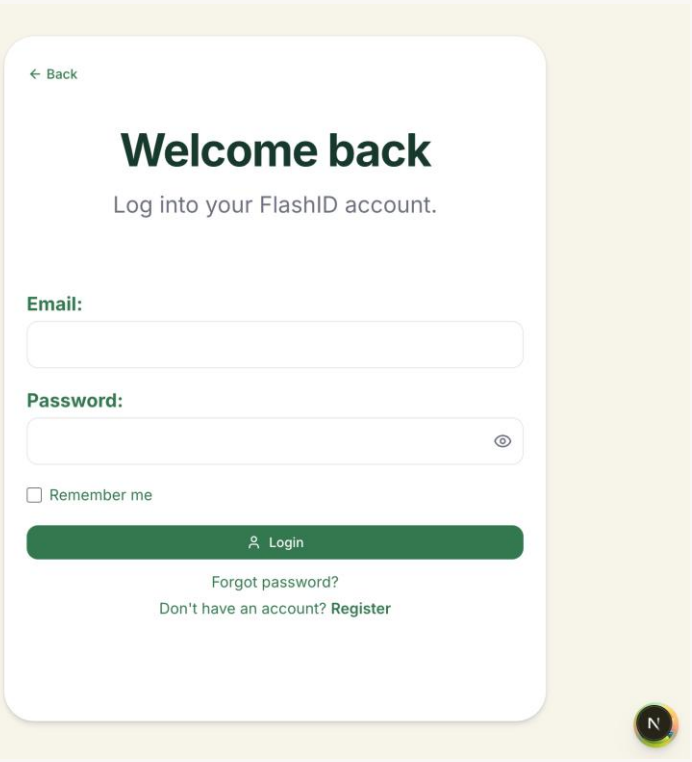

Sign In

If you already have a FlashID account:

- Open the FlashID application or website.
- Enter your registered email address.
- Enter your password.
- Select Log In.
- Once authentication is successful, you will be taken to your FlashID dashboard.

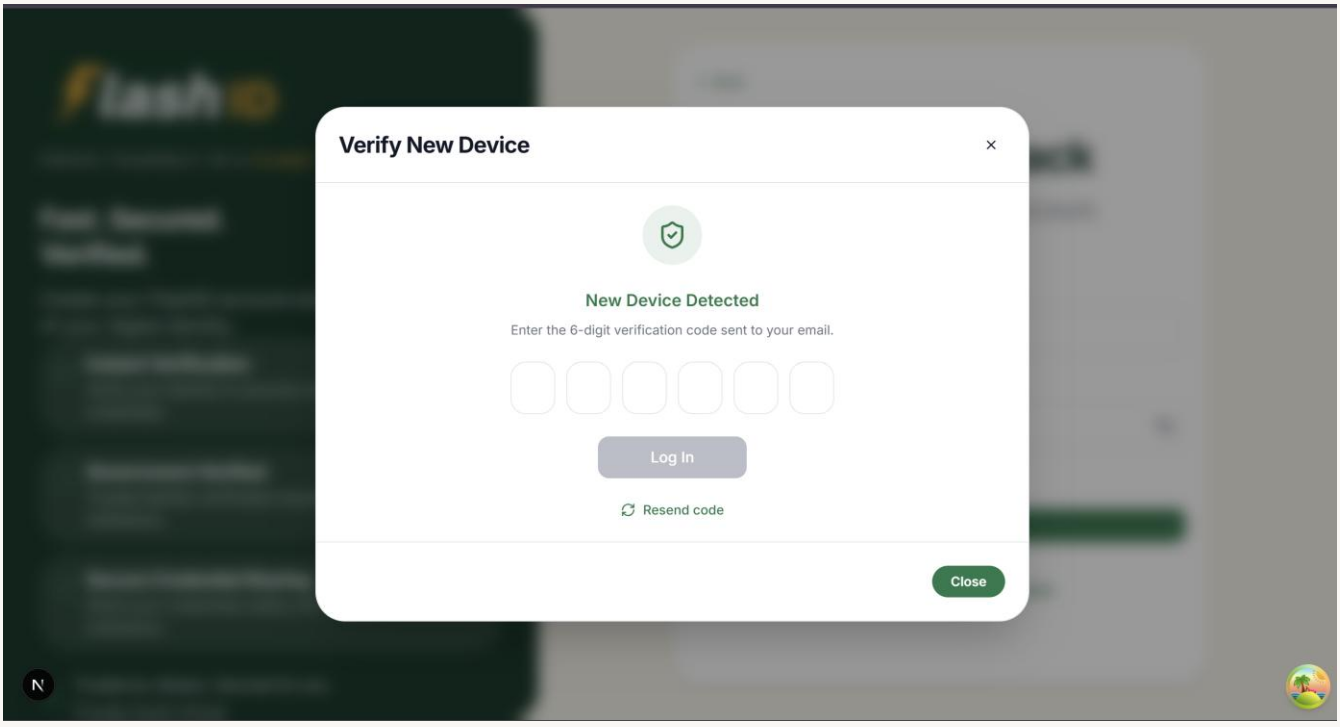

Your dashboard provides access to your wallet and the features available to your account.

Verify New Device

- If it is your first time logging in on that device, you will be prompted to enter a Verification Code to verify the device you are logging into your account on. This will add the device to a list of trusted devices linked to your account.

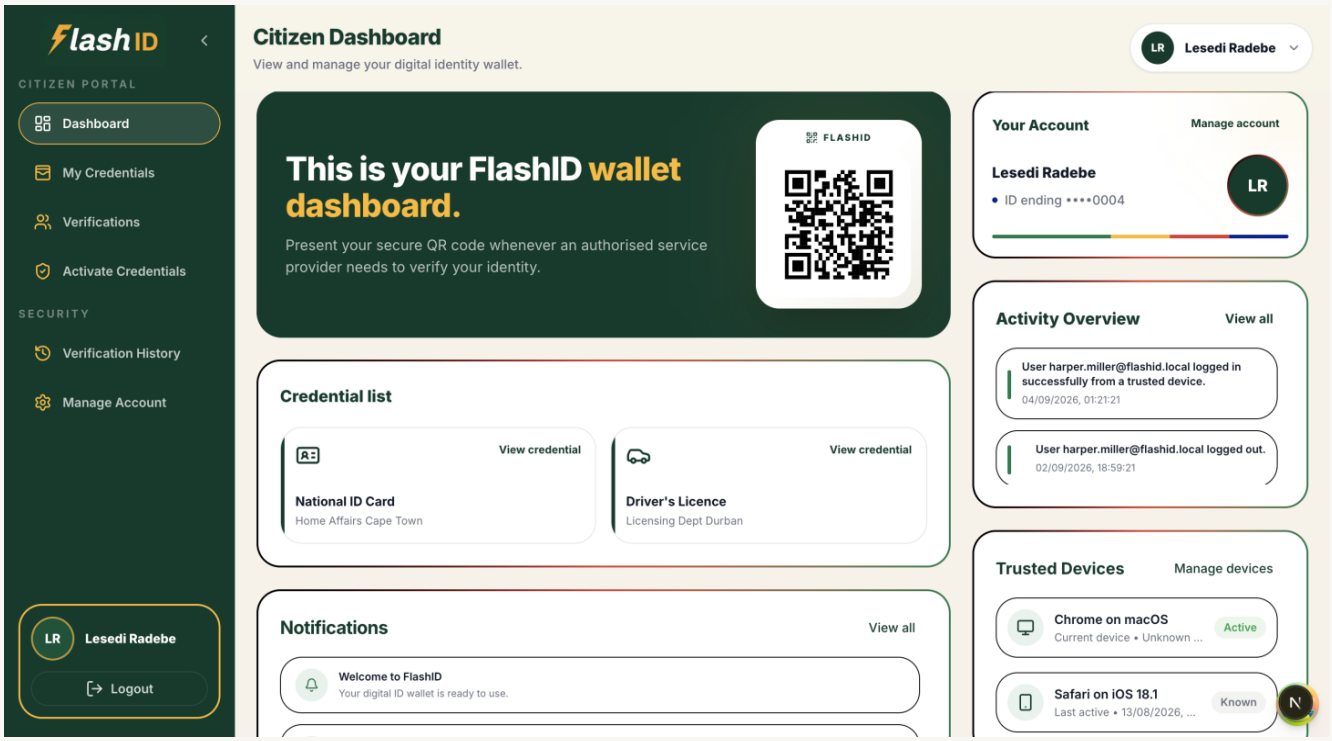

Your dashboard

After signing in, you are taken to your FlashID dashboard. The dashboard provides an overview of your digital identity wallet and gives you access to the main features of FlashID.

Dashboard

Your dashboard is the main starting point for managing your FlashID account.

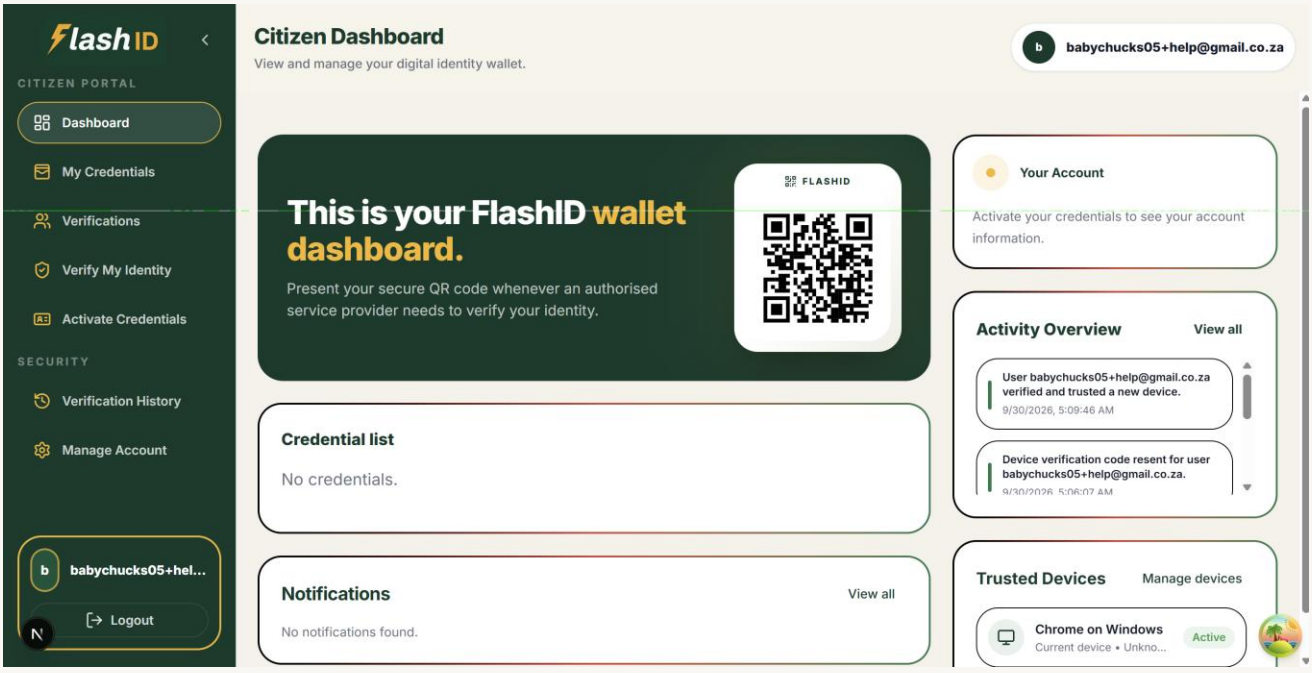

From the dashboard, you can access areas such as:

- Your digital credentials.
- Recent account activity.
- Account and security features.

The dashboard is designed to give you an overview of your identity information without requiring you to navigate through multiple screens.

Activate Digital Wallet

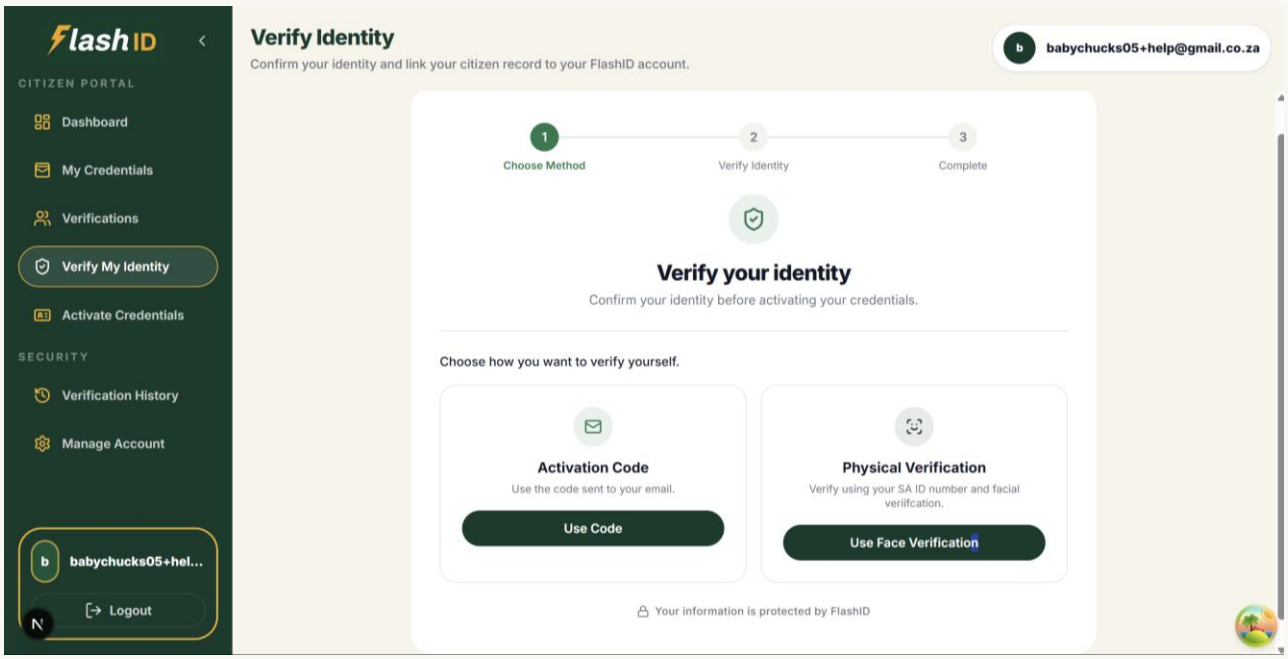

- Your initial account registration and login will not be linked to a citizen record, so your dashboard will appear similar to the dashboard below.

- Your will be required to activate your digital wallet in the following two steps:
  1. Verify My Identity
     - This is the process of proving you are the owner of the ID number and citizen record you want to link to your account. Only one account may be linked to your citizen record. There are 2 flows to achieve this.

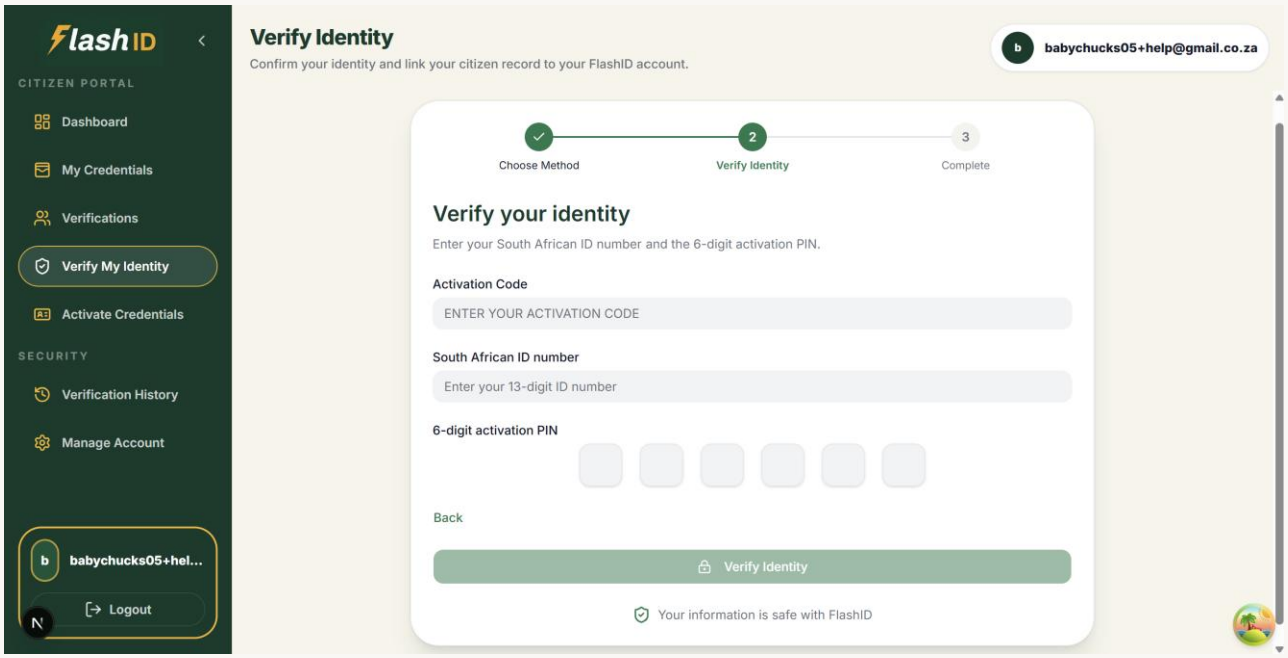

Verify My Identity

- On the verify my identity tab you are able to choose which flow you would like to follow for identity verification.

1. Activation Code Flow

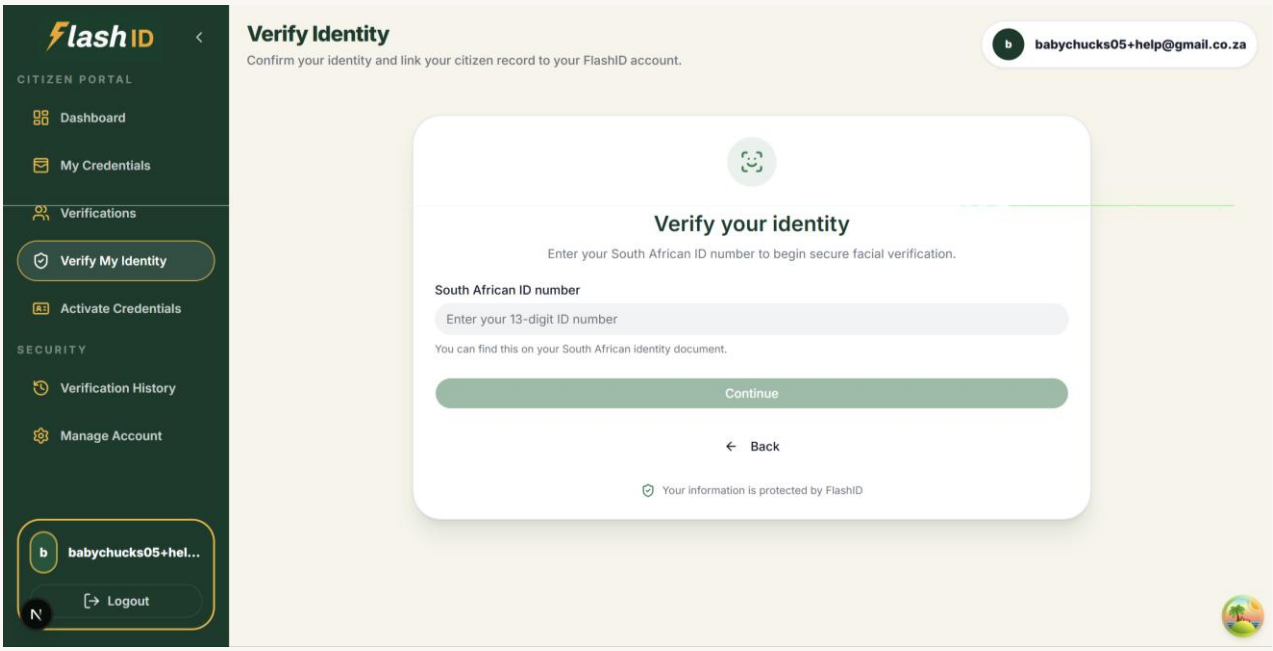

- This flow requires a visit to home affairs on which an official will onboard you onto FlashID and you will receive an activation code on the receipt of your visit and an email address containing the activation link and/or token.

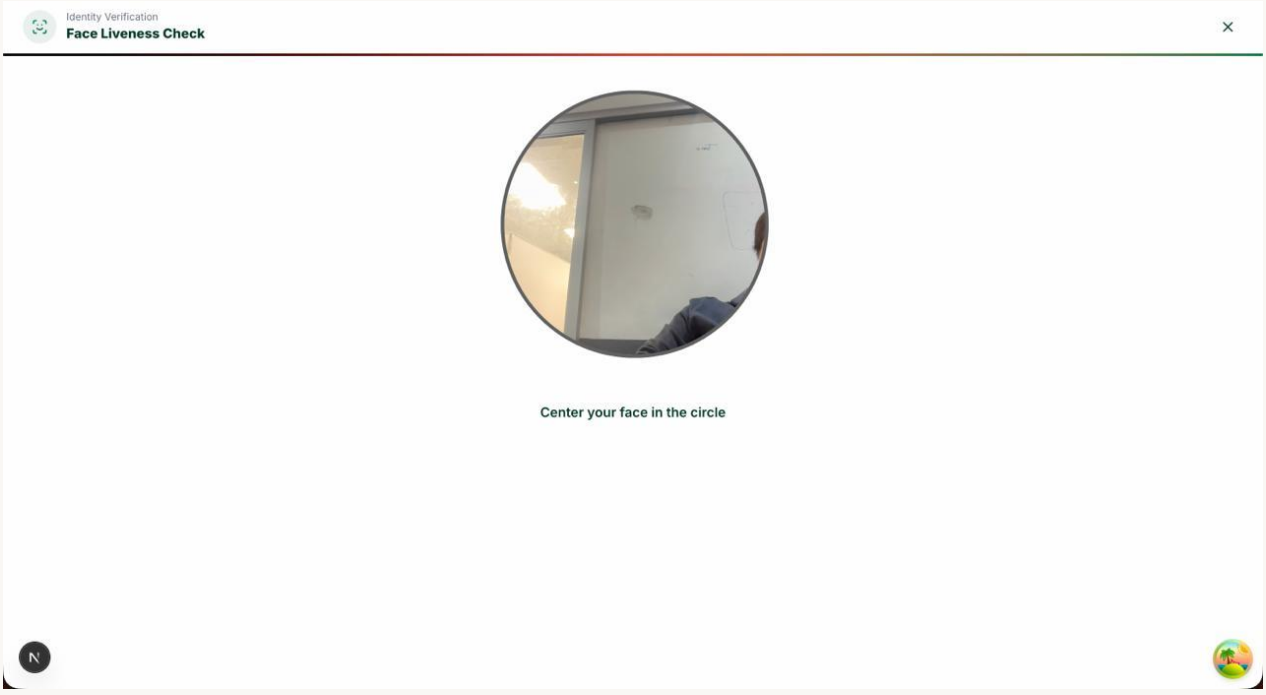

Verify My Identity

2. Physical Verification

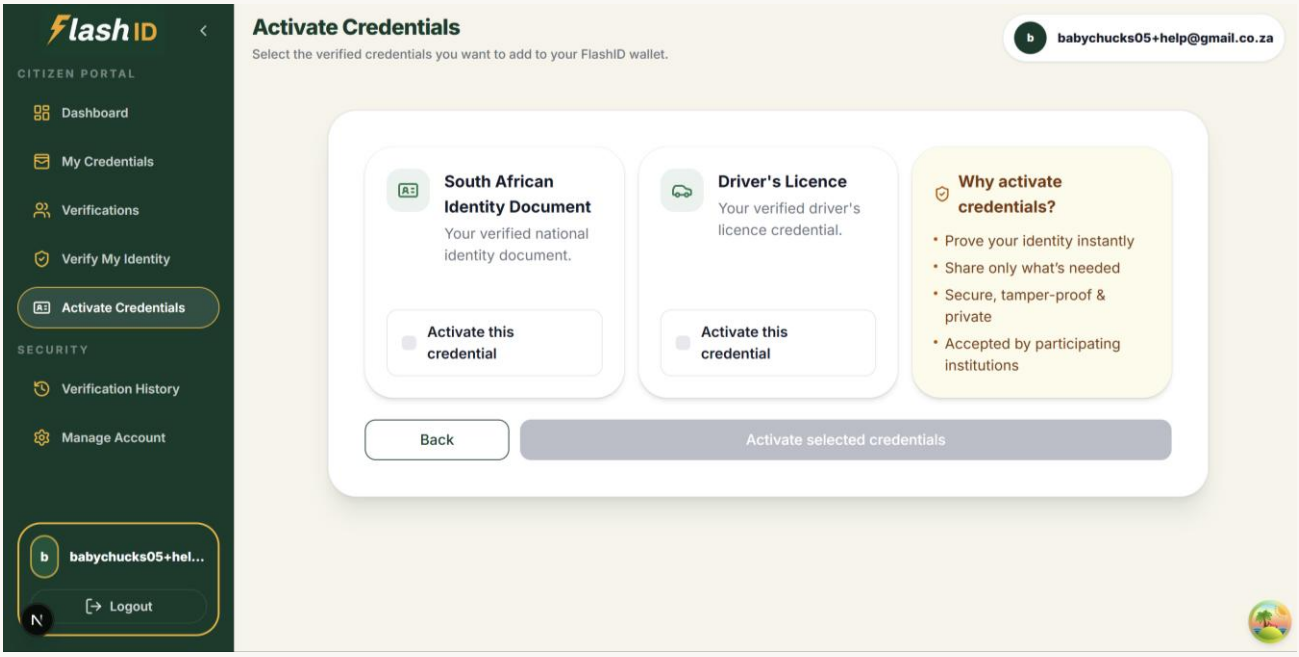

- This flow can be done at home. You will be required to enter your valid South African ID. Afterwards you will be redirected to the Face Detection Service that will detect your liveness and face match you to the image attached to your citizen record. If this succeeds, you would've successfully verified your identity.

Activate Credentials

- Once you have successfully verified your identity you can proceed to select the credentials you would like to have digital version created for.

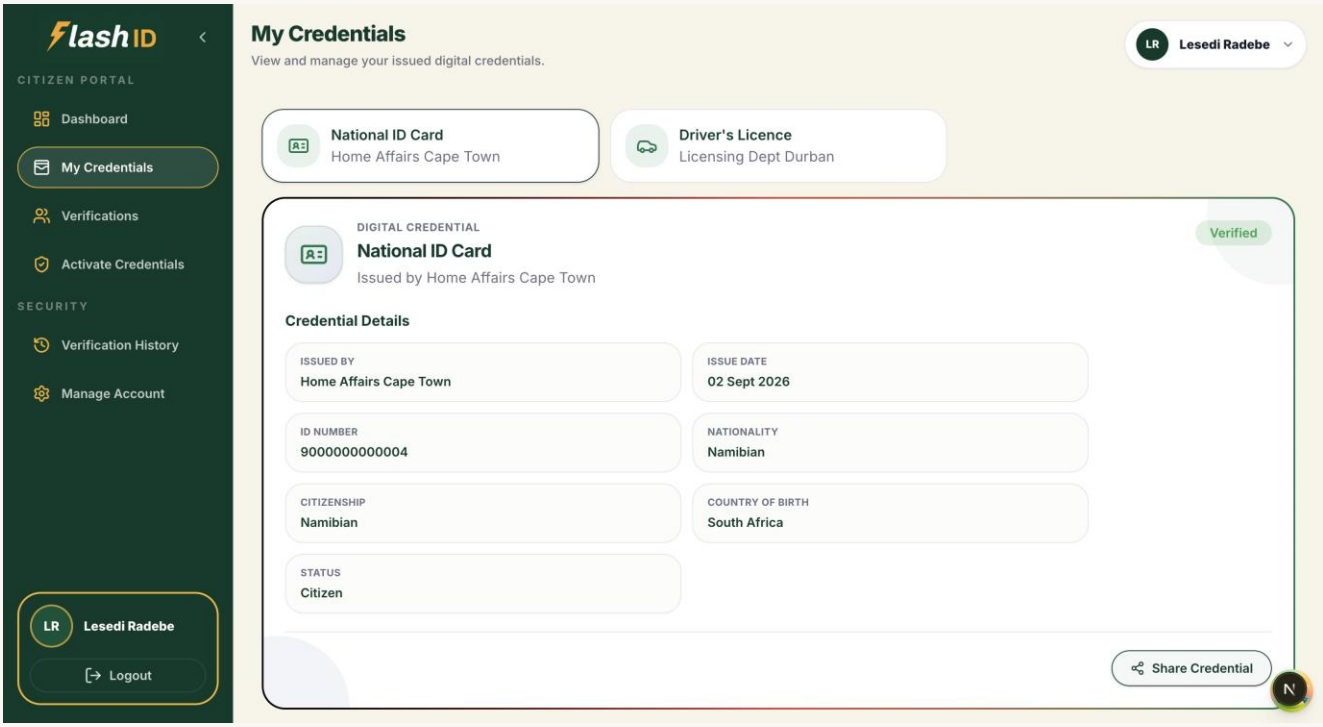

Accessing Your Credentials

Your credentials are available through your digital wallet.

Select the appropriate wallet or credential area from the dashboard to view the credentials associated with your account.

You can also click on the My Credentials tab from the navigation bar, which will take you to the My Credentials page.

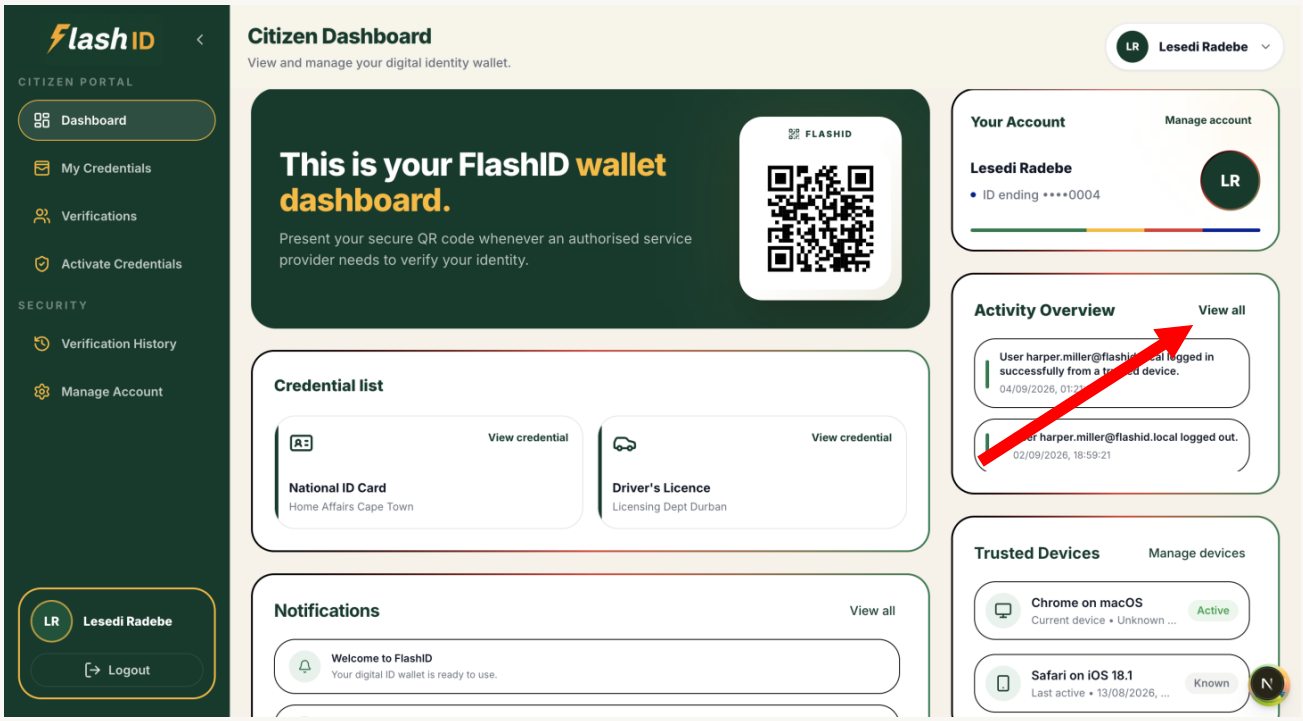

Depending on the credentials available to your account, you may be able to view information associated with your digital identity.

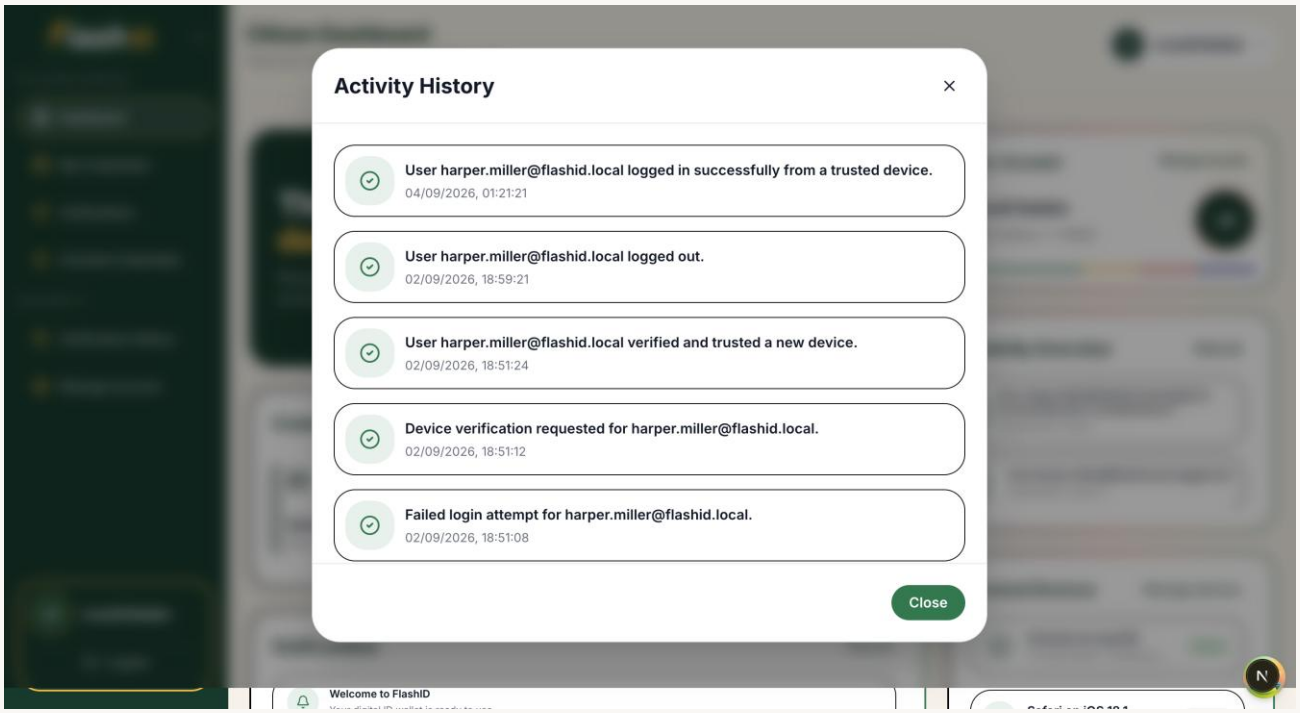

Recent Activity

FlashID provides an activity area where you can review recent events associated with your account.

Activity can help you understand what has recently happened within your wallet.

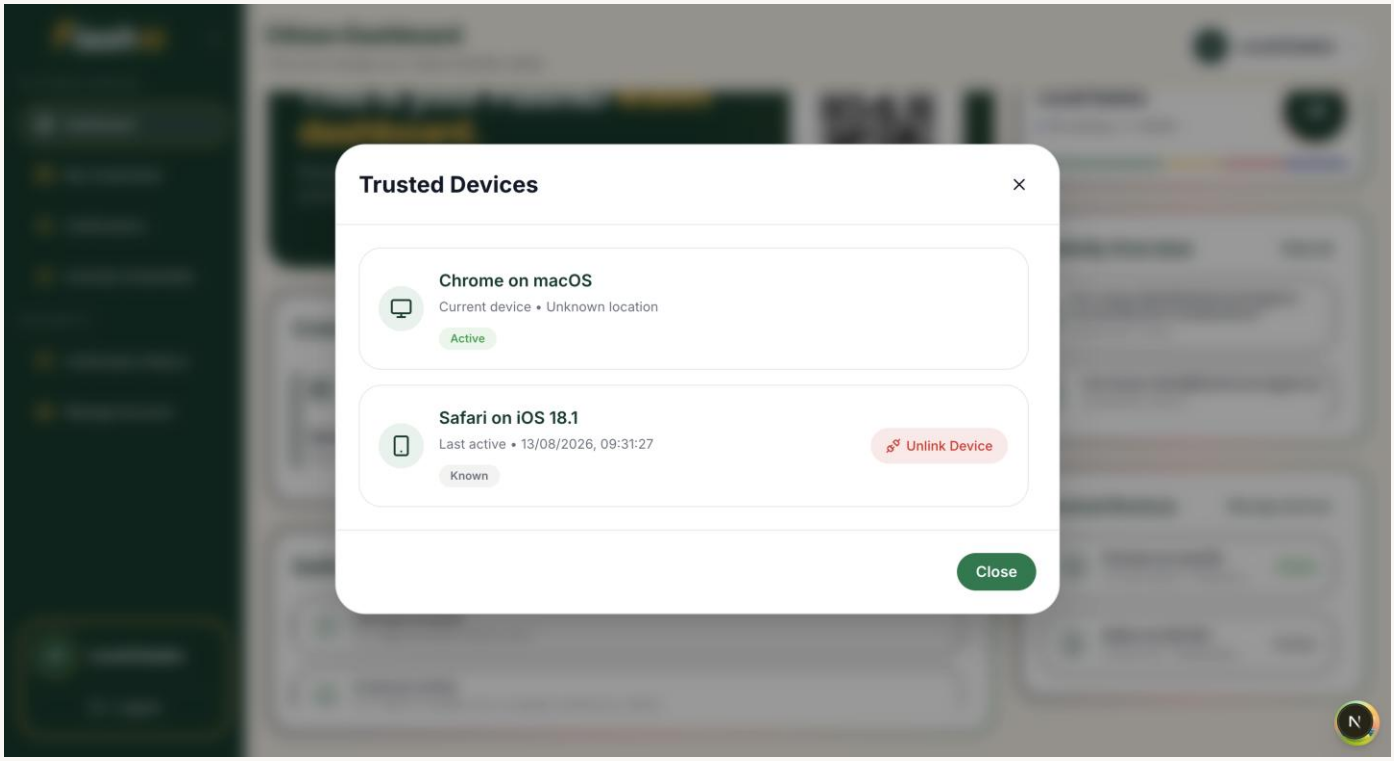

Trusted Devices

FlashID can use trusted-device functionality to help protect access to your account.

A trusted device is a device that has been recognised or approved for use with your FlashID account.

When managing trusted devices:

- Navigate to Trusted Devices.
- Review the devices associated with your account.
- Check that the devices listed are familiar to you.
- Unlink device if needed.

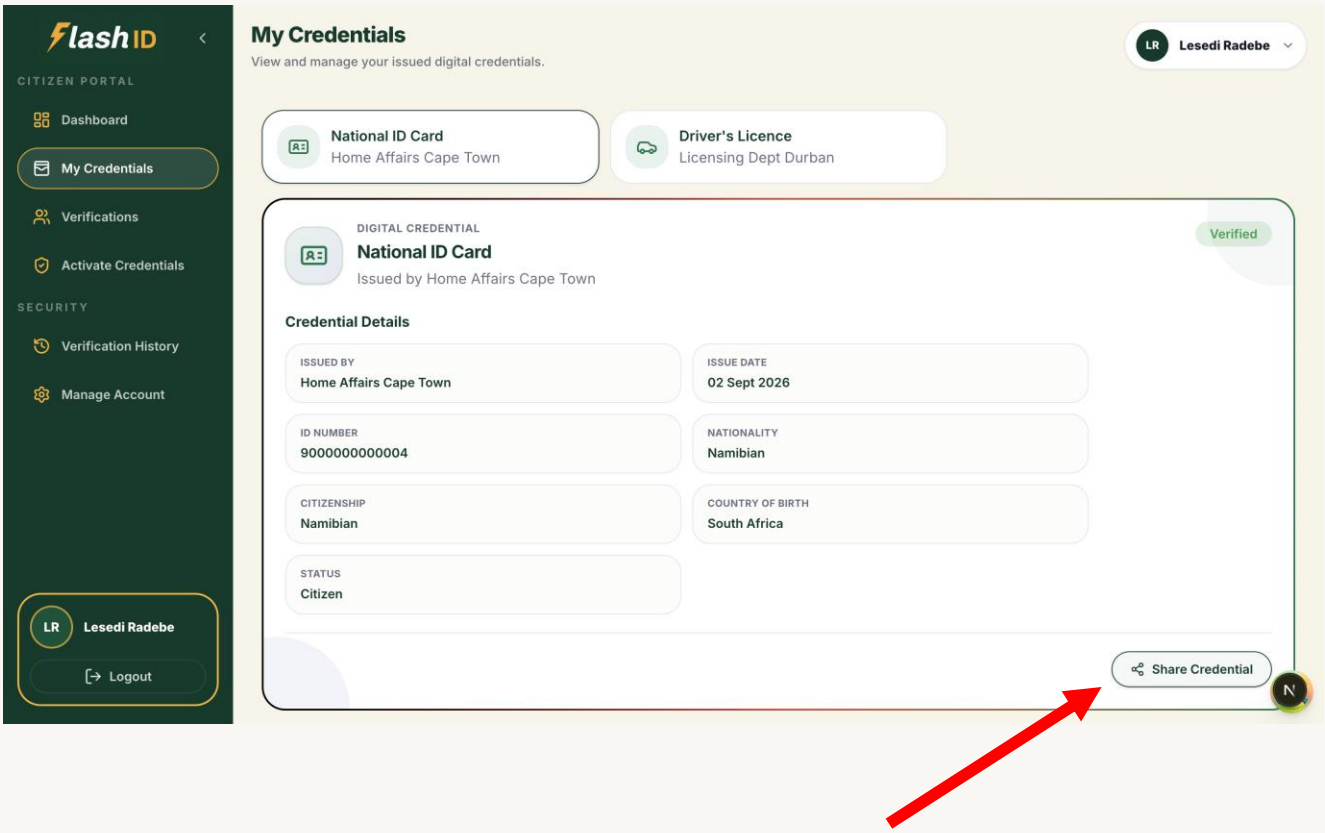

Sharing or Using a credential

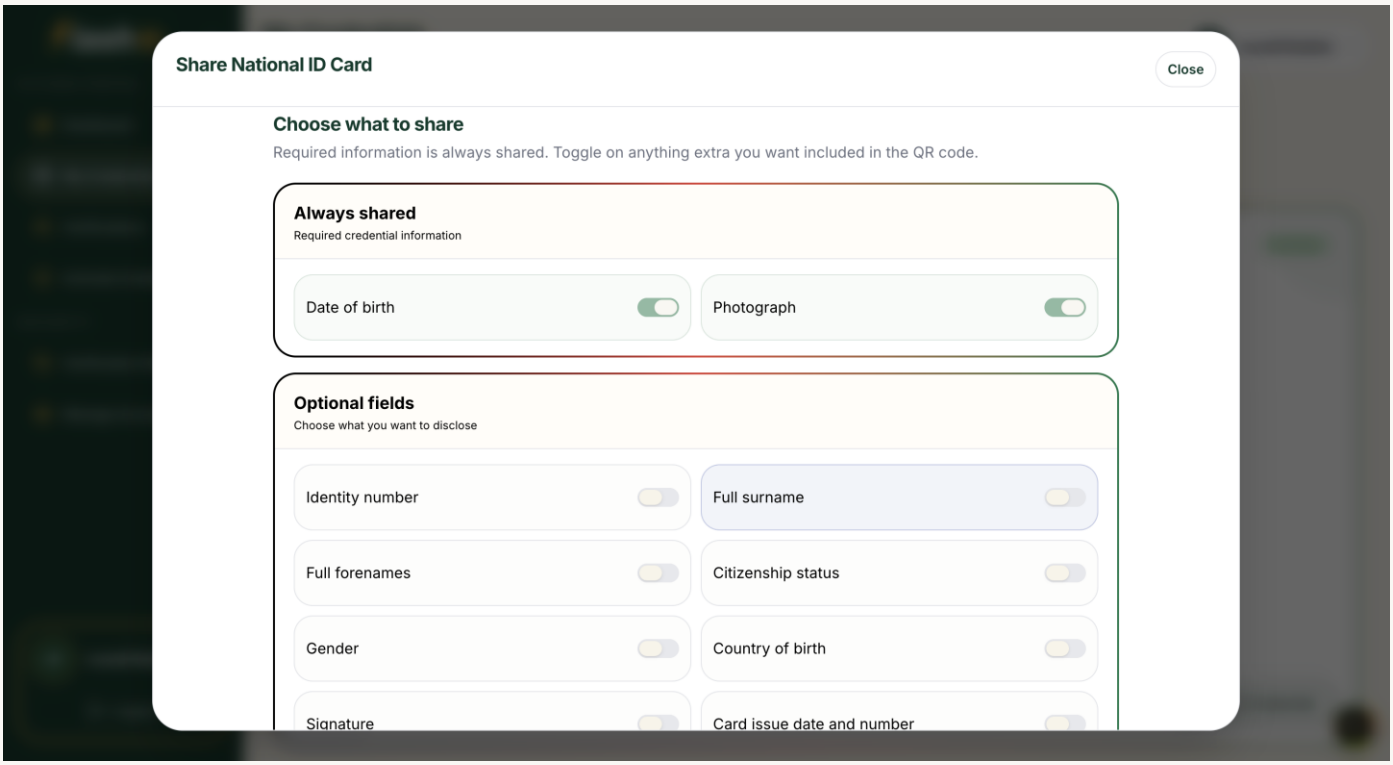

When you need to provide verified information, FlashID can be used to access the relevant credential.

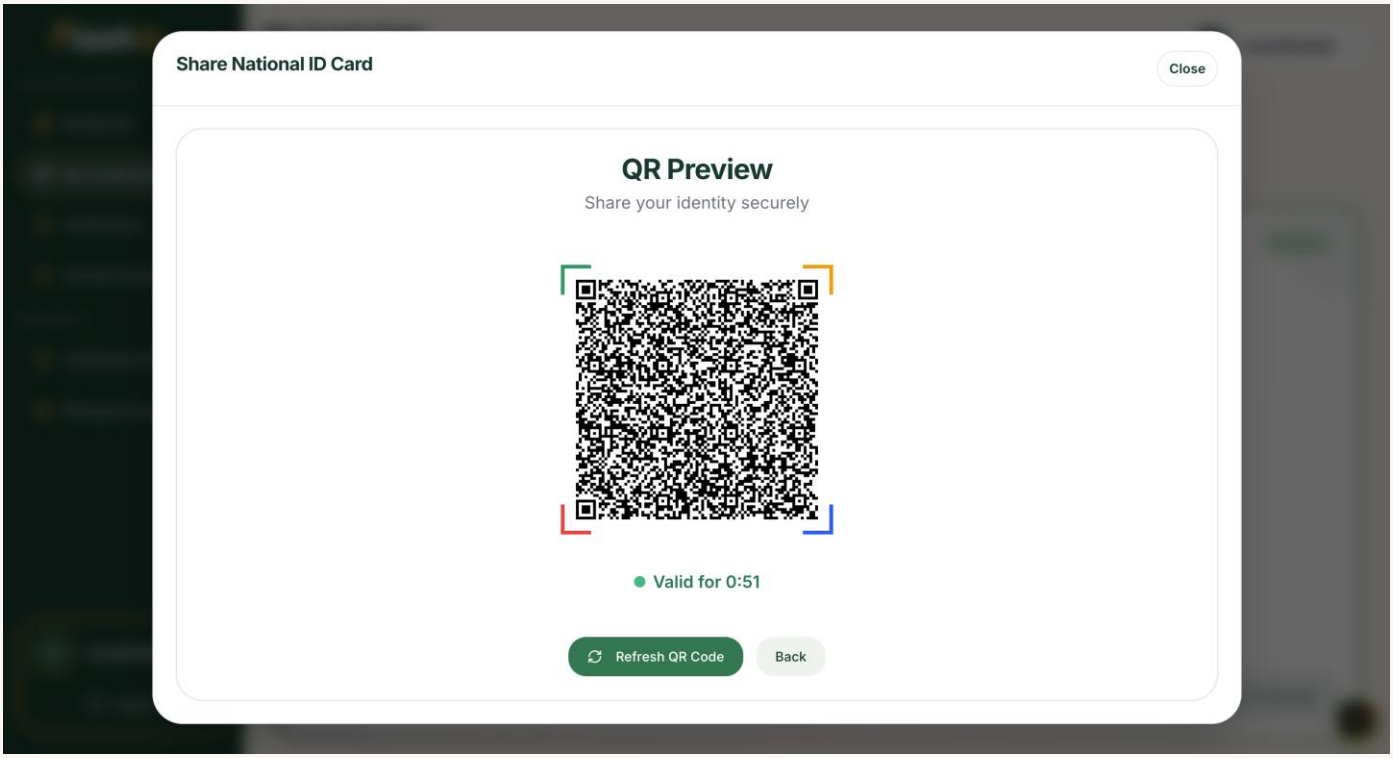

Before sharing information:

- Check which credential is being requested.
- Review the information that will be provided.
- Confirm that you are comfortable with the information being shared.
- Continue with the verification or sharing process.

Only provide the information required for the purpose of the verification.

Notifications

Notifications provide information about important events or actions that may require your attention.

When a notification appears:

- Open the notification.
- Read the information provided.

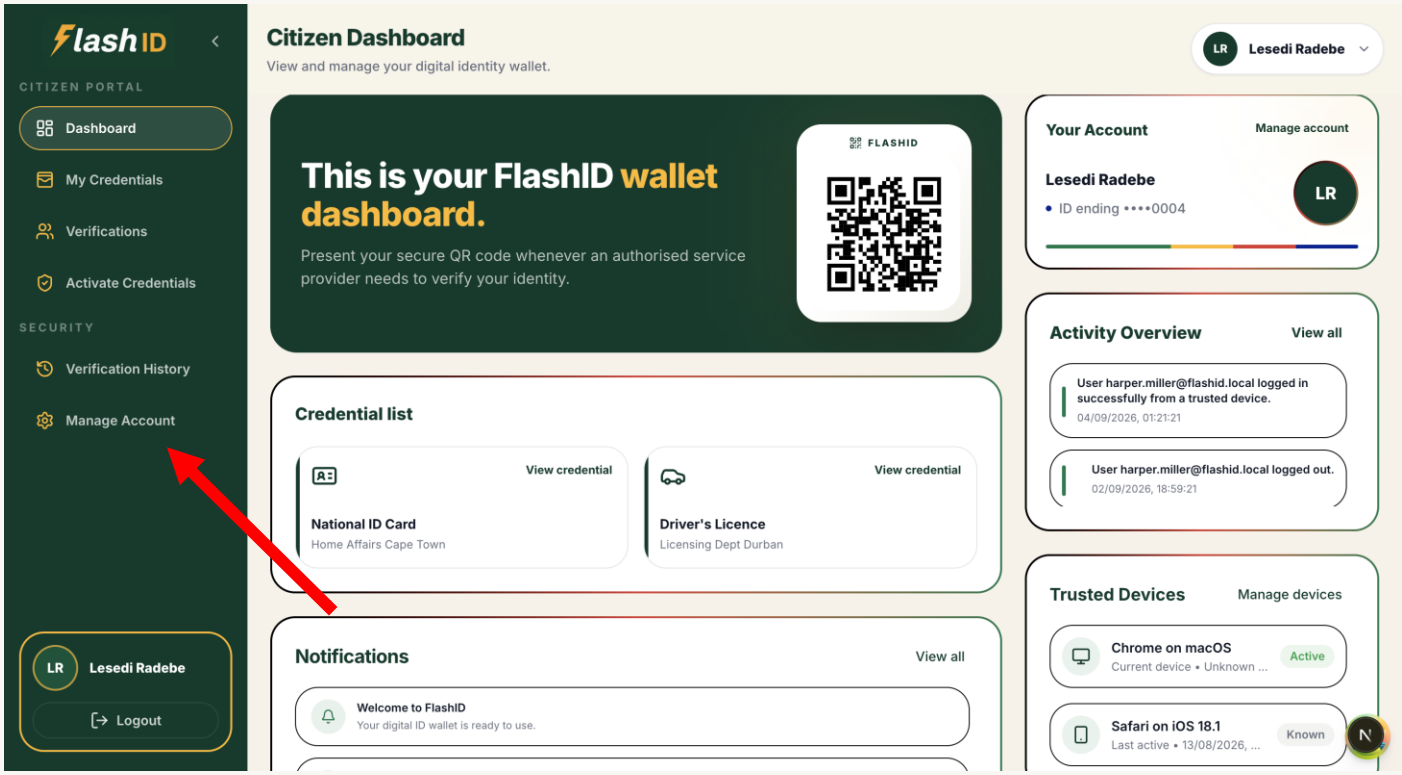

Manage Account Settings

Account Settings allows you to manage information associated with your FlashID account.

You can use this area when you need to update your account details or manage your account.

Click on the Manage Account tab on the navigation bar to be get to the manage account page.

The available settings are displayed within the account management area.

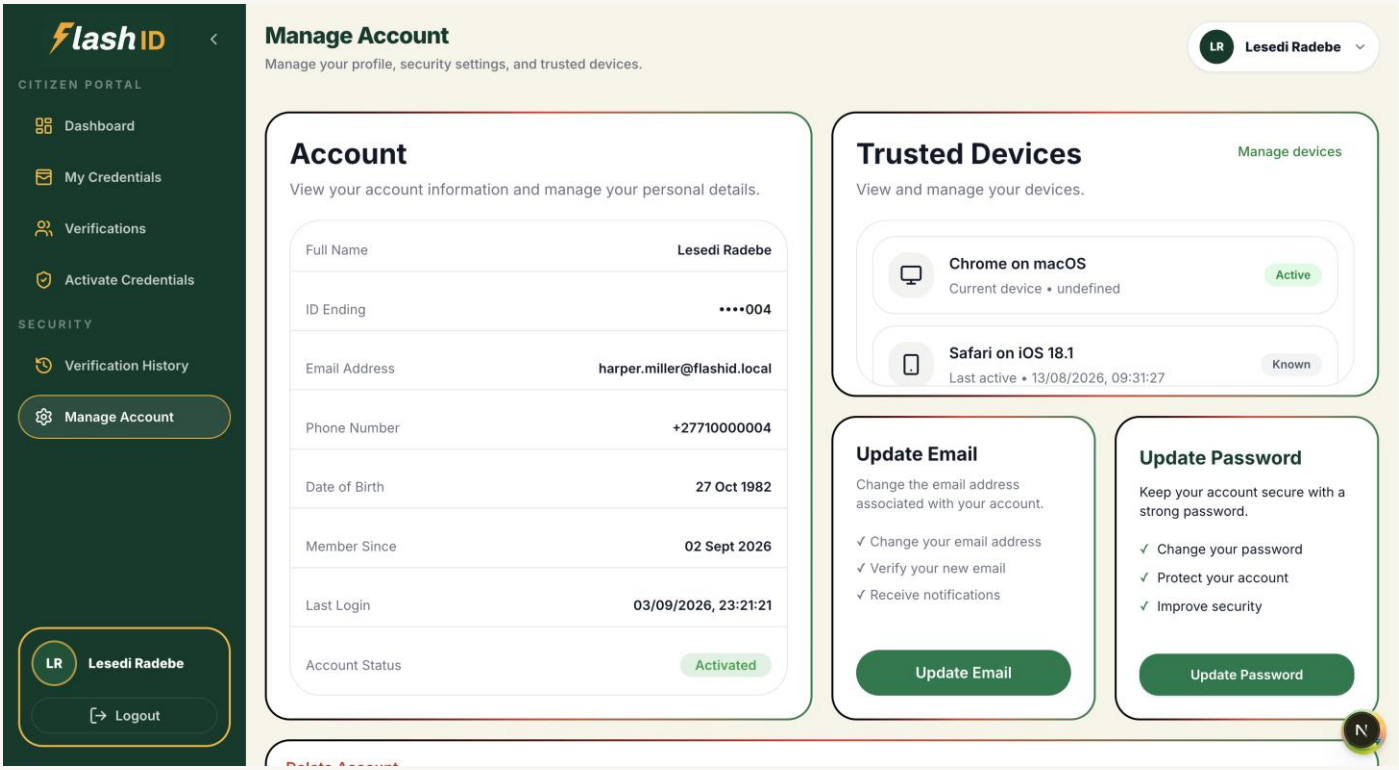

Updating your email address

You can update the email associated with your account through your account settings.

To update your email:

- Open Account Settings.
- Select the option to update your email address.
- Enter your current password.
- Enter your new email address.
- Enter the otp that is sent to that email address
- Save or confirm the change.

Make sure that you enter an email address that you can access.

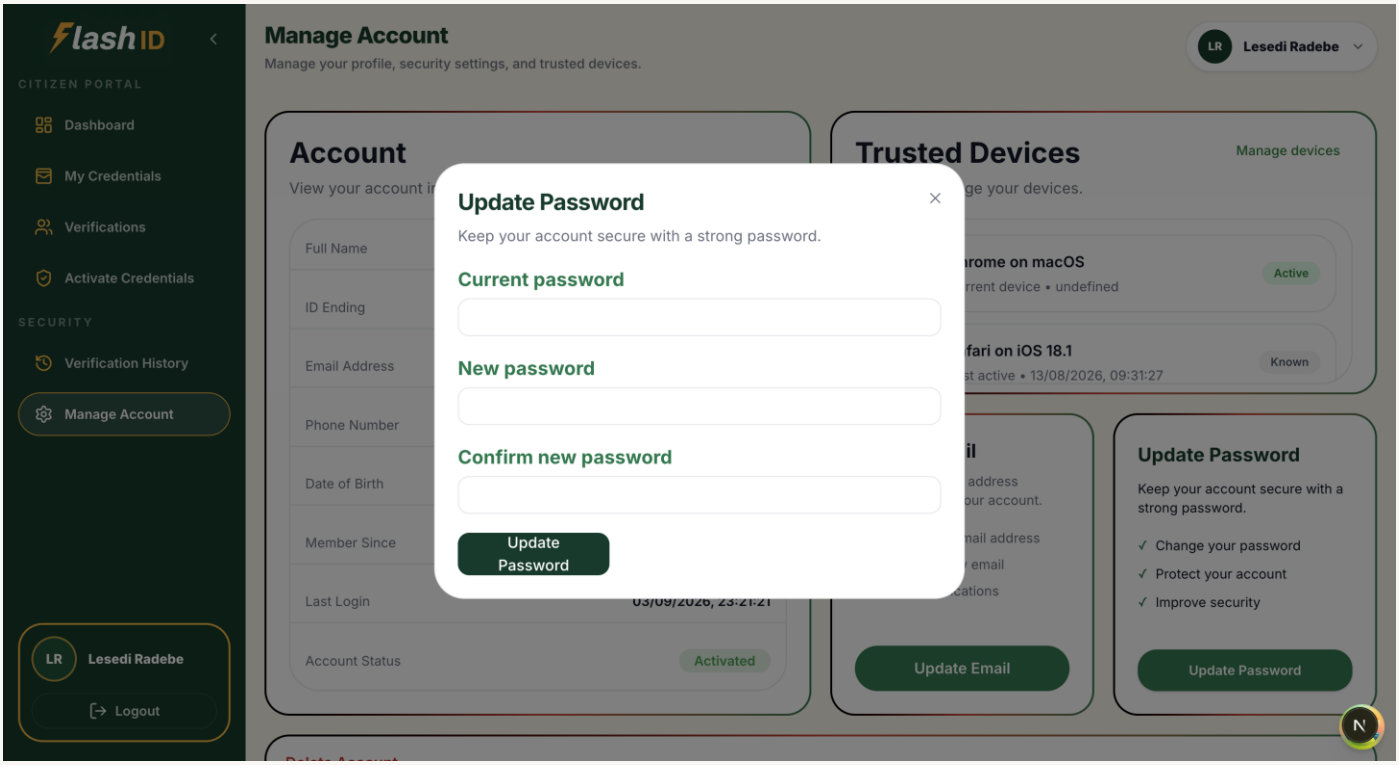

Updating your password

You can manage your account password through the account settings area.

To update your password:

- Open Account Settings.
- Select Update Password.
- Enter current password.
- Enter new password
- Confirm the change.

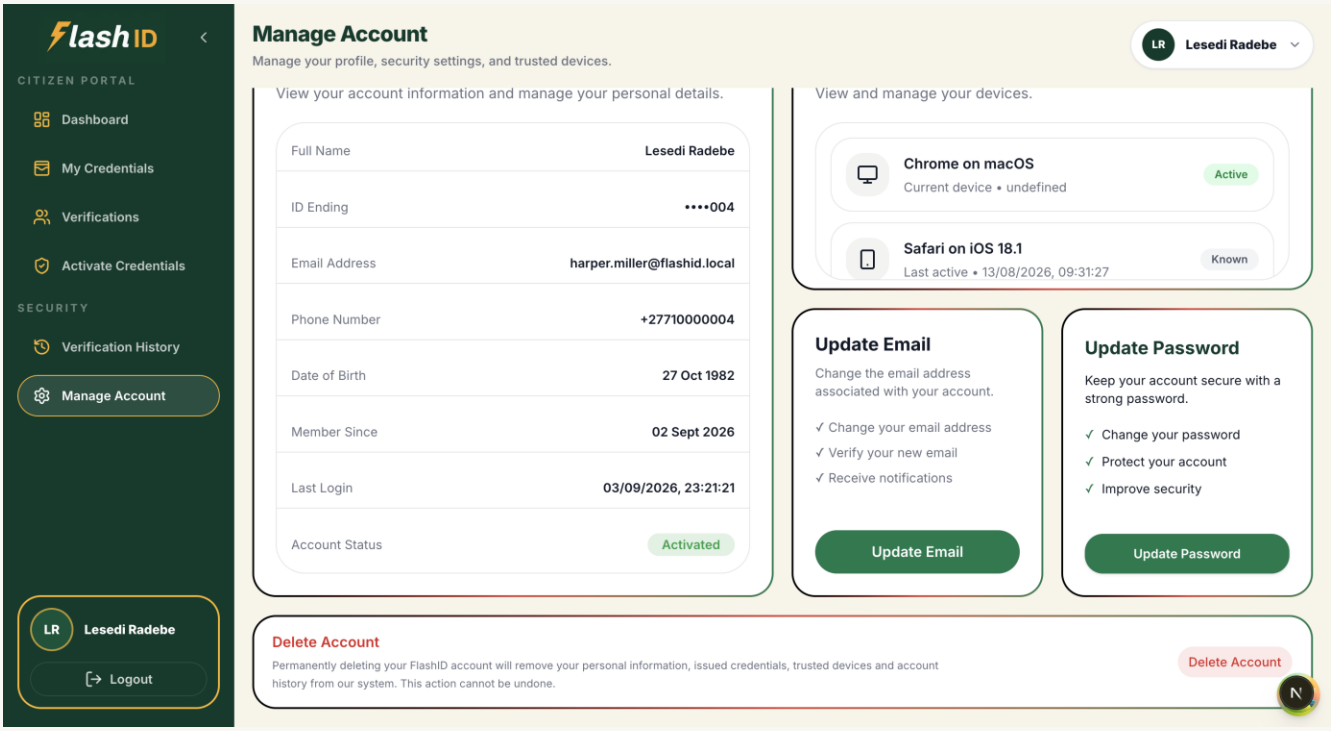

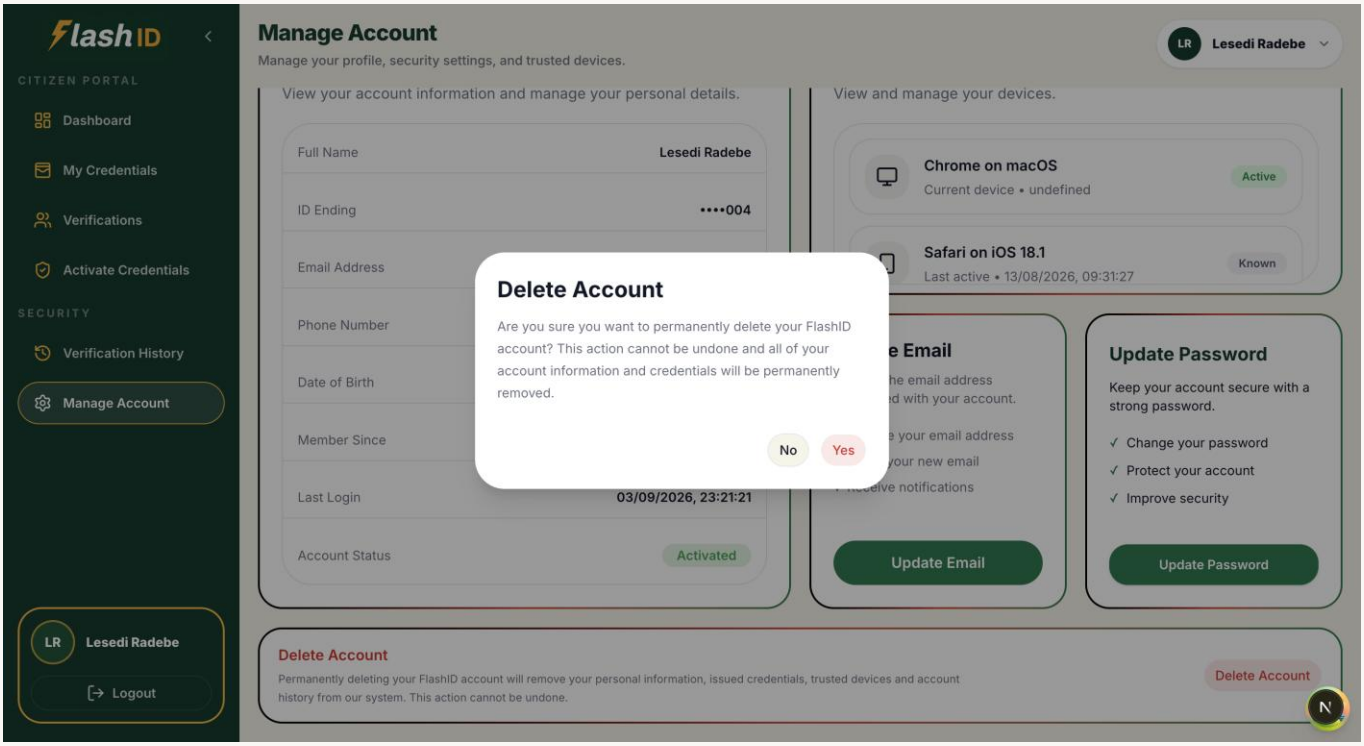

Deleting Your Account

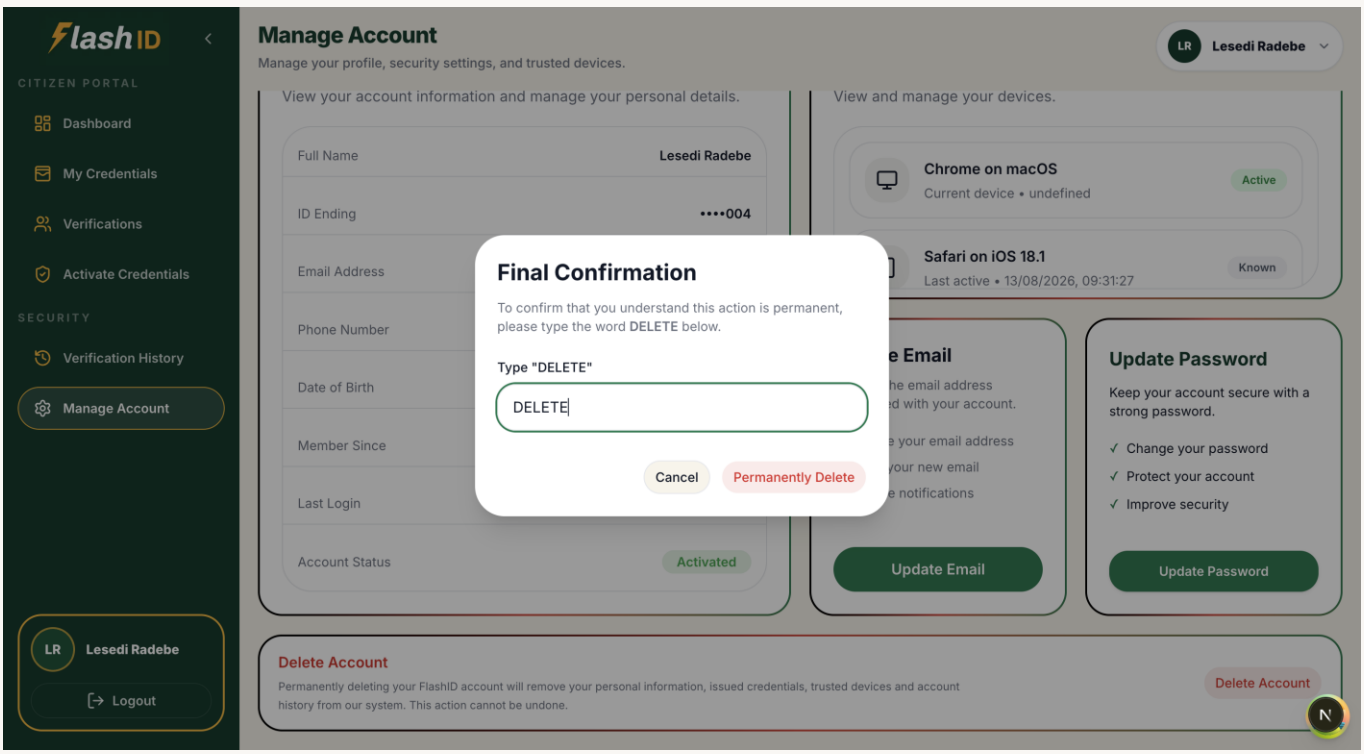

If you decide that you no longer want to use FlashID, the account settings area may provide an option to delete your account.

If you choose to continue:

- Open **Account Settings**.
- Select the account deletion option.
- Read the warning or confirmation message.
- Type out the word 'DELETE'
- Confirm deletion
