FlashID Branding Specifications Document

Tech Titans ~ Capstone 2026
Version 1.0

Purpose of the Design System

This document defines the Flash ID design system to ensure consistency across all user interfaces including the citizen dashboard and admin portals. This provides consistency with one centralized source of truth.

Mandatory: Only the colours defined in this document may be used. Colours must be used by role and purpose, not decoration.

Logo Specification

Primary Logo:

Variant(s):

Colour Palette

Primary Green

#007A4D

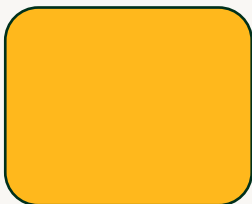

Primary actions, trusted states, secure accents.

Deep Green

#053B2C

Headers, dark surfaces, hover states.

Accent Gold

#FFB81C

Speed, emphasis, primary highlight, QR accents.

National Red

#DE3831

Secondary identity accent and SA palette support.

National Blue

#002395

Tertiary identity accent and SA palette support.

Colour Palette

Clean White

#FFFFFF

Cards, elevated surfaces, content containers.

Cream Background

#F7F4EA

Light mode app background.

Secure Night

#031F18

Dark mode background and secure-mode panels.

Text Primary

#111827

Main body text on light backgrounds.

Muted Text

#6B7280

Captions helper text, secondary labels.

Colour Palette

Neutral Mid Grey

#9CA3AF

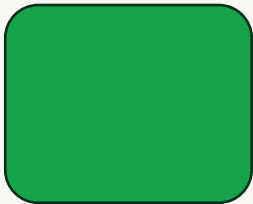

Disabled or inactive interface elements.

Border Grey

#E5E7EB

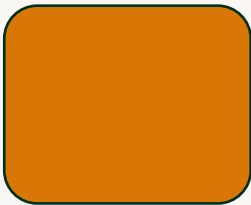

Borders, dividers, input outlines.

Success Green

#16A34A

Success feedback.

Warning Amber

#D97706

Warning states.

Danger Red

#DC2626

Destructive actions, high-risk warnings.

Typography

Primary Font :

Inter/Sans-serif

Typography Scale:

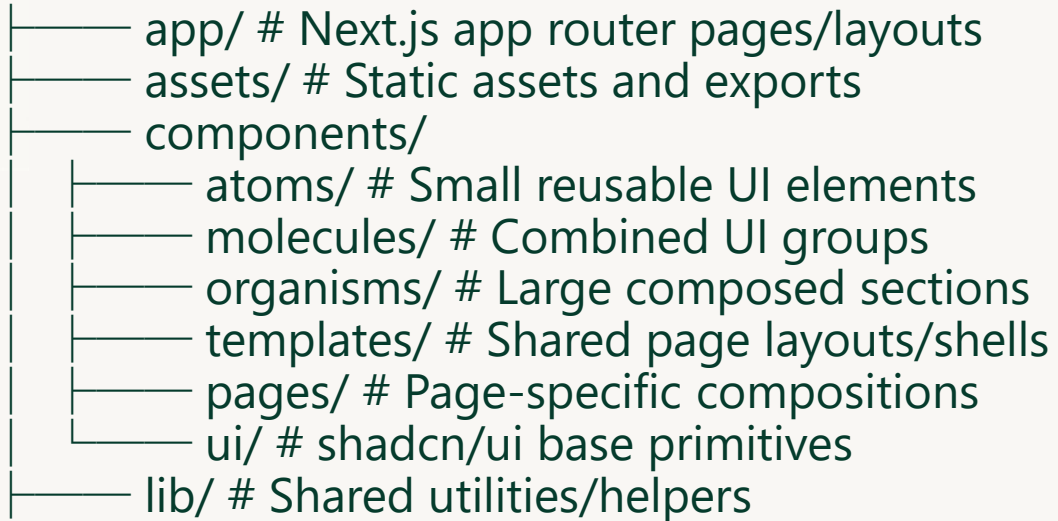

Element	Size	Usage
H1	40px to 48px	Page Titles
H2	32px	Section Titles
H3	24px	Subsection Titles
Body	16px	Paragraph Text
Small	14px	Helper Text

- **Note:** *As all pages are based on the designated TEMPLATE, the H1 heading size and styling are predefined and do not need to be manually configured.*

Component Organisation and Usage

Organisation:

src/

Usage Rules:

- shadcn/ui is the canonical component foundation.
- Shared colours must use semantic CSS variables.
- Hardcoded colours should be avoided where possible.
- Shared layouts belong in organisms/templates.
- Business logic should not live inside UI primitives.
- Components should remain composable and reusable.

Iconography

- FlashID uses the Lucide icon library for a clean, modern, and lightweight iconography system aligned with shadcn/ui.
- All icons to be imported from Lucide Icons Gallery
 - `import { "..."} from "lucide-react";`

Themes Usage Rules

- Light Mode :
 - Cream background
 - White Cards
 - Dark Text
- Dark Mode:
 - Secure Night/ Deep Green background
 - Dark Cards
 - Light text

Both themes must maintain contrast and readability

Accessibility

The system must follow a style that supports high contrast text, readable font sizes and clear navigation.

- **Mandatory:** All pages, components, and interface elements must be fully responsive and function correctly across both desktop and mobile devices. The layout must adapt dynamically to different screen sizes, resolutions, and orientations. Non-responsive implementations are not permitted.
