FlashID

South African Digital ID System

Tech Titans – Capstone 2026

Demo 1

The Problem

Costly to Replace

Fragile and Forgettable

Globally Behind

Introducing FlashID

- A secure digital identity platform for South African citizens
- Store and manage verified credentials digitally
- Reduces the risks of lost, forgotten, or damaged physical IDs
- Enables trusted and secure credential sharing

Repository Setup and Management

SETUP

- Mono repo structure
 - South-African-Digital-ID-Wallet/
 - ├── .github/
 - ├── workflows/
 - ├── backend.yml
 - ├── web.yml
 - └── mobile.yml
 - ├── backend/
 - └── FlashIdBackend/
 - ├── web/
 - └── src/
 - ├── mobile/
 - ├── docs/
 - ├── README.md
 - ├── package.json
 - └── pnpm-workspace.yaml

MANAGEMENT

- Branching Strategy
 - Branch off of dev to build:
 - feature/
 - docs/
 - fix/
 - chore/
- All pull request must be approved by at least one member
 - Enforced with branch protection
- Tasks managed using Issues on GitHub Project Board
